

COMAIRCO

COMPRESSED AIR SPECIALISTS

— SINCE 1972 —

EXPERTS AT YOUR SERVICE:
**THE COMPREHENSIVE SOLUTION
THAT MAKES A DIFFERENCE**

SERVICE • PARTS • SUPPORT • REPAIR • MODERNIZATION

RELIABLE AFTER-SALES SERVICE

PREVENTIVE MAINTENANCE PLANS

COMAIRCO offers preventive maintenance plans to minimize costly unplanned downtime, maximize the efficiency and reliability of your compressed air production, and meet manufacturers' maintenance requirements.

24/7 SERVICE, 365 DAYS

COMAIRCO offers emergency service and repair, available 24 hours a day, 7 days a week. Our technicians provide round-the-clock service to perform maintenance or repair on your compressed air equipment.

GENUINE PARTS

COMAIRCO has one of the largest inventories of genuine parts in North America. We ensure that we have the right parts necessary for your compressed air equipment.

CERTIFIED TECHNICIANS

At COMAIRCO, we have a dedicated team of over 100 qualified technicians, along with a group of planners, technical advisors, and experienced service managers. We believe in the importance of ongoing training, and all our personnel are constantly trained by our numerous trusted suppliers.

OVER 80 CERTIFIED TECHNICIANS 24/7 SERVICE

CUSTOMIZED AND QUALITY SERVICE TO ENSURE THE RELIABILITY
AND EFFICIENCY OF YOUR COMPRESSED AIR SYSTEM

RENTAL FLEET

Our company has a significant inventory of equipment available for rental. This includes diesel and electric units (both lubricated and oil-free), air dryers, accessories, and outdoor solutions (AWA) for various industries.

PREDICTIVE ANALYSIS

COMAIRCO provides predictive monitoring services such as oil analysis, leak analysis, audits, and real-time readings. Our engineering department interprets the data and provides tailored recommendations to meet your needs.

NATIONAL COVERAGE

COMAIRCO has over 20 branches across Canada and the United States. This coverage allows us to share our knowledge of your various installations and create an efficient synergy.

PARTNERSHIP WITH INDUSTRY LEADERS

As an exclusive distributor, COMAIRCO offers a range of top-tier product lines in the compressed air industry. Our commitment to innovation drives us to stay at the forefront of the latest technological advancements. We take pride in providing our customers with privileged access to the most high-performing and reliable solutions in the market.

COMPLETE SOLUTIONS : SUPPORT, REPAIR AND UPGRADE

SUPPORT

AUDIT :

Audits review the entire compressed air system to identify ways to maximize efficiency by reducing losses and energy consumption, as well as optimizing usage. Audits provide the most accurate data possible on current conditions. They help identify opportunities for component upgrades and ensure that the entire system is functioning properly.

AIR LEAKS :

We offer detection, identification, and repair of air leaks.

AIR NETWORKS :

Our specialized air network team can design a customized system according to your needs.

TRAINING :

We provide on-site or off-site service training seminars for managers, users, and maintenance personnel.

WARRANTY :

With pride in our experience and expertise, Comairco offers various warranty plans for repaired components and remanufactured equipment.

REPAIR

COMPRESSOR BLOCK :

Comairco repairs and refurbishes compressor blocks for all compressor brands.

REMANUFACTURED COMPRESSOR :

At Comairco, we are experts in the complete refurbishment of all types of compressors. Our team of specialized technicians will conduct an assessment with a detailed quote, perform meticulous disassembly, fine-tuning, and thorough cleaning, as well as update major components to ensure optimal performance. This service is provided in our workshops.

MODERNIZATION

CONTROL PANELS :

Our technicians are experts in compressed air equipment and offer services for updating, replacing, and repairing control panels for compressors and air dryers. With their in-depth knowledge of the latest innovations, they ensure efficient management of your system, even with compressors of different sizes, through master control panels.

COMPRESSOR UNIT FOR DRILLS:

Fast turnaround times thanks to our extensive inventory of parts. The rebuilding process includes replacing all bearings and O-rings, repairing the sealing band, re-machining bearing bores, grinding rotor faces and seal collars, machining housings, repairing gears, fixing broken or cracked shafts, and dynamically balancing all rotating components.

BOOSTER UNITS:

Reconstruction of a screw air pressure booster unit, model S-150. Complete reconditioning of the compressor, controls, refurbishment of the electric motor, sandblasting of the unit, new hoses, and fresh paint.
