

AirLinx[®]

CONNECTIVITY FOR SULLAIR PORTABLE AIR COMPRESSORS

AirLinx is an IoT solution putting critical compressor data, alerts & reporting at your fingertips—wherever you are!

REMOTE MONITORING

Track GPS location, warnings/faults, utilization & telematics data of Sullair assets alongside your existing mixed fleet.

- Pressure & temperature monitoring for engine & compressor
- Run hours, altitude, battery voltage, torques, speeds & more

CUSTOM ALERTS & REPORTS

Configure theft, telematics & operations-based alerts.
Generate manual or scheduled reports for utilization, incidents & trips.

- Live & historical reporting for up to 12 months
- Chart telematics & movement data helping provide insights over time
- Custom alerts based on movement, telematics data, inputs & sites

HELPS MAXIMIZE TIME & EFFICIENCY ON THE JOBSITE

Use Service Management tool to track when machines need service, perform preventative maintenance & upload service records.

- Pre-configured hardware comes standard on new Sullair Tier 4 Final & Electric portable compressors
- Quick access to support & service plans via Sullair Hub
- Easily integrate with a mixed fleet

RETROFIT KITS AVAILABLE. CONTACT YOUR LOCAL SULLAIR SALES REPRESENTATIVE TO LEARN MORE.
